Customer meeting 14.10

Time: 17.00
Duration: 1h
Participants: Torstein, Maren, Markus, Stein-Otto, Øyvind, Peder
Notes: Torstein

1. Approval of agenda
   a. OK
2. What we have done until now.
   a. General
      i. tdt4290.blogspot.com
      ii. Results from survey.
      iii. Report
      iv. Updated website http://crowdshelf.xyz/
         1. Added API
         2. Changed layout
   b. Design:
      i. Started to work on design of search functionality
   c. Backend
      i. Deployment and docker
   d. iOS
      i. Movie:
         https://drive.google.com/drive/folders/0Bw3Dv7m7JXyGQUc3cGJ0c1pYWHc
         Feedback: Ingen lyd, ellers bra
         Eksperimentere med navn, eks My Shelf -> My Books. Crowds etc.
   e. Android
      i. No changes
      ii. Started on crowds
      iii. Adding a tab bar
         Feedback: Follow platform design guidelines are priority #1;
      consistency across platforms comes second.

f. Action points

Action point	Ansvarlig	Frist	Utført Y/N	Dato	Comments
Give feedback during the scanning of a book.	Øyving -iOS Markus - Android	14.10	N		Only feedback when the app is searching after found isbn. Not feedback when barcode is not found yet.
Search for books in library	Maren	14.10	Y	14.10	Works on a lot of books, but found some flaws; Almost no norwegian books. And maybe clearer feedback ^

La brukere legge inn bokinfo manuelt, ved å ta bilde av boka. Bokinfoen

Feedback kan sendes til og lagres hos en bokinfo-tjeneste som er separat fra API-et.

Søke etter bøker (med tittel osv) for å finne ut om noen i dine crowds eier boken. Dropp søk etter crowds. Eier av crowds må invitere brukere. La alle brukere kunne se en liste over alle eksisterende crowds for å se eier, medlemmer.

3. What we plan to do next week
   a. Conduct usability test of various designs.
   b. Analyze use of application
   c. Finish v0.4

4. Feedback from the customer
   a. Search -> Wants a list of who has the book (actually has it)
       i. -> Maybe number of copies you've got
       ii. -> Borrow -> see availability
       iii. -> Who has it button
   b. Rent out button
   c. Do not care about availability before the user demands it
   d. Key Performance Identifier (mixpanel): Hvor mange har lånt en bok?
      Måle endringer i bruk fra versjon til versjon for å måle suksessen til funksjoner
      Måle hvor mange som får treff på Google Books API

Join and leave in crowd-view
Create default crowds:
Netlight accounts (Oslo, Munchen, Stockholm..)
Crowdshelf-dev (vår gruppe)

5.   Questions from the group
   a.   None

6.   Other
   a.   None
